S4YE Learning Series

S4YE co-organized with [IFC Vitae initiative](#) a webinar **The Private Sector: Advancing Digital Skills at Scale** on June 16. The webinar explored how education institutions address the growing demand for digital skills, the role big tech and smaller private sector education technology companies play, and how to reach underserved populations at scale.

In our recent report [Digital Jobs for Youth with Disabilities](#), S4YE explored strategies that programs have used to increase the inclusion of youth with disabilities in digital jobs.

During a webinar hosted on June 3, S4YE shared key learnings from the design and implementation of digital jobs & training programs for youth with disabilities. Katherine Guernsey (USAID), Tiziana Oliaro (Cheshire), Colin Blackwell (Enablecode) and P. Rajashekar (Shesh) discussed possible solutions and challenges faced by private sector in integrating assistive technologies, working with the private sector in designing inclusive training programs to increase opportunities for youth with disabilities.
